

Mines of the County

One of the largest sets of rolls for the Gold Road mill ever brought to Arizona was hauled out to Gold Road Thursday morning. The weight of the machine was nearly twenty-five tons and was sent in knocked down. All the other machinery being placed in the big mill is of the same substantial nature and indicates that the company are going in on a solid basis.

H. L. Harris came in from the Weaver mining district a few days ago with samples of ore from a new strike which he made in that country. He reports that there are many veins in that country that carry values in gold, but that owing to the absence of water it will be a long time before they can be worked. The development of water or some cheap power is a necessity to the welfare of the district and this will be supplied should the government construct a dam at Bull's Head or some point further up the river.

A report is in circulation in Kingman that a recent sampling of the Dempsey O'Dea mine, near Mud Springs, gave a result of seventeen ounces gold for a width of three feet of the vein. A crosscut on the vein has developed eight feet of ore and in all the openings good values are obtainable. The owners are hard at work developing the property and those who have examined it say that it is one of the greatest strikes ever made in the county. The location is handy to wood and water and is accessible by wagon road.

We understand that within the next ten days a large force of men will be put to work on the Homestake group of mines, near Silver Creek, owned by R. J. Holmes, and that they will be developed just as rapidly as possible. The mines have had considerable work done on them by Mr. Holmes and the group is looking exceptionally well. The ore is of a very high milling grade and even under present conditions the mines would be able to keep a good sized plant in ore for some time to come. The Gold Road people will handle this property and may decide to take over some other mines in connection with them to make up a large group.

Porfirio Noli came up from Bill Williams Fork a few days ago and reports that the mines near Planet are developing into bonanzas. These are the mines that recently caused considerable excitement and upon which work has been carried on for months past. Mr. Noli's claim has an ore body four feet in width, eighteen inches of which will average over two ounces in gold to the ton. The other mine owners of that country have also opened up good veins, but the ore is not of a shipping grade and they are all awaiting the erection of a mill on the river to handle the ores. The mines are on the river bank and all the water that may be needed for a mill can be pumped from the stream, while wood abounds in large quantities for miles along the river banks. The ore carries a small percentage of copper, but not enough to interfere with its amalgamation by the ordinary mill process.

At the C. O. D. mine the drift west on the 30 is now in 90 feet and is being driven rapidly ahead. When 1,000 feet is reached an upraise will be made to the surface, which will be used as the main working shaft. Only a small force is being worked at the mine, but good headway is being made. When the new shaft is completed a large force will be put to work opening up stopes and getting the mine in producing shape. A big reduction plant will be installed near the new shaft that will handle more than 100 tons of ore daily. With a few unimportant breaks in the vein the ore chute in the mine shows up the full length of the drift and carries big values in gold and silver. Milling tests on this ore shows that it can be dressed up into a very high grade concentrate, and which is found to be very desirable at the smelters.

World Wide Reputation.

White's Cream Vermifuge has achieved a world wide reputation as being the best of all worm destroyers, and for its tonic influence on weak and unthrifty children, as it neutralizes the acidity or sourness of the stomach, improves their digestion, and assimilation of food, strengthens their nervous system and restores them to the health, vigor and elasticity of spirits natural to childhood. 25c at H. H. Watkins' drugstore.

Chief Engineer Cochran of the proposed cutoff west from Congress has completed the work as far as the Colorado river and cross-sectioning will soon be commenced. The road as now located will run to the Colorado river near Parker and will have the easiest grade of any of the old lines across western Arizona. It is thought that this new road will have the backing of the Rock Island, which road is now seeking a Pacific coast outlet. The road will cut into the business of the Southern Pacific largely if built. It will also open up one of the richest gold and copper countries in the southwest.

C. A. Stevens, superintendent of the Gold Road mines, was in Kingman Monday last, having business with the board of supervisors. It is understood that the Gold Road company is to aid in the building of a road between Acme and Silver Creek and which road will be extended to the Leland and the other mines on the west side of the mountain, and the board of supervisors have been asked to contribute something toward the building of this road in the way of receipts from road taxes in that district. The Gold Road company has extensive mining interests in that section and a good wagon road is one of the necessary things in opening up these mines. The board is willing at all times to extend aid in the building of roads in the county just so far as it is in their power.

Last Tuesday we visited the placer fields in Sacramento Wash, nine miles west of Needles. A large part of that country has been staked off and people are still making locations. The discovery of gold was made in the canyon by W. H. Orr, who was working on a bedrock, or rather a submerged dam, for the purpose of raising the water flowing below the surface and taking it into Needles for domestic uses and power. Mr. Orr found that in the clay seams in the gravel was big values in gold and at once changed his plans to the development of water for hydraulic purposes, and when this has been accomplished he will begin sluicing the rich ground below the dam-site. It is estimated that there is a depth of over sixty feet of pay gravel in the canyon the average of which is about eighteen dollars to the cubic yard, or twenty five cents to the pan. We were shown some of the gold taken from the borings at the dam and it is of the same character of that found in the Chemehuevi mountains. The gold shows considerable wear, none of the larger pieces having a ragged or sharp corner on it. Several miles of the canyon above the dam has been filled on; some of the owners are at work sinking shafts for the purpose of ascertaining what they have got. While the main gravel channel is deep and while the gold may be there in paying quantities it will be a costly undertaking to work it. On the other hand it would not be at all surprising if many of the debouching washes would not prove rich in shallow diggings. There is little excitement over the diggings noticeable in Needles, but if later work proves the ground to be as rich as the enthusiasts appear to believe the little city on the Colorado will have a boom second only to the Klondike.

A Sure Thing.

It is said that nothing is sure except death and taxes, but that is not altogether true. Dr. King's New Discovery for Consumption is a sure cure for all lung and throat troubles. Thousands can testify to that. Mrs. C. B. Van Metre of Shep erdtown, W. Va., says: "I have a severe case of Bronchitis and for a year tried everything I heard of, but got no relief. One bottle of Dr. King's New Discovery then cured me absolutely." It's infallible for Croup, Whooping Cough, Grip, Pneumonia and Consumption. Try it. It's guaranteed by H. H. Watkins, druggist. Trial bottles free. Reg. sizes 50c, 18.

Notice to Creditors.

Estate of Joseph Burke, deceased. Notice is hereby given by the undersigned, administrator of the estate of Joseph Burke, deceased, to the creditors of, and all persons having claims against said deceased, to exhibit them with the necessary vouchers, within four months after the first publication of this notice, to the said administrator, at his place of business in the town of Kingman, Arizona Territory, at the office of Fred. W. Morrison, in the Gaddis & Perry building, Fourth Street, in said town of Kingman, the same being the place for the transaction of the business of said estate, in said town of Kingman.

WALTER S. ABRAMS,
Administrator of the estate of Joseph Burke, deceased.
Dated at Kingman, this 8th day of April, 1903.

"To the East"

in a Tourist Sleeper" is the title of a booklet, (free for the asking) describing the new and attractive Tourist Cars run between California and Chicago on the

Mine Warning Notice.

To Whom It May Concern: Notice is hereby given that the Ben Harrison and Tom B. Reed mining claims, in San Francisco mining district, Mohave county, Arizona, are under lease and bond to parties working the same, and that neither the mines nor the undersigned co-owners thereof will be responsible for any labor or debt contracted, nor injuries sustained by any employer or employee in working said property; and that no employer or employee is the agent of the owners for any purpose whatever, and that all operatives engage in such service at their own risk, and that no debt or claim of debt is valid against said mining claims or their owners.

WALTER HAWKINS.
Kingman, June 15, 1902.

Mine Warning Notice.

To Whom It May Concern: Notice is hereby given that the Nighthawk mine, situated in Wallapai mining district, Mohave county, Arizona, is under lease to parties working the same, and that neither the mine nor the owner thereof will be responsible for any labor or debt contracted, nor injuries sustained by any employer or employee in working said property; and that no employer or employee is the agent of the owner for any purpose, and that all operatives engage in such service at their own risk, and that no debt or claim of debt is valid against said mining claim or their owner.

NIGHTHAWK MINING CO.,
GEORGE M. BOWERS, Supt.
Kingman, Arizona, March 6, 1902.

Mine Warning Notice.

Notice is hereby given that neither the Tarr mine, situated in Wallapai mining district, Mohave county, Arizona, nor the undersigned owner will be responsible for any debts contracted or labor performed by parties engaged in working said mine under lease and bond.

Manuelito, New Mexico, June 24, 1902

ROSS H. BLAKELY & CO.,
ABSTRACTORS.

We are now prepared to furnish full and complete Abstracts of Titles of lands, mines, and town lots within Mohave county, Arizona, including records of Probate and District Courts, Delinquent Tax and Sheriff Sales.

ROSS H. BLAKELY, Manager.

A MODERN STORE

IS THAT OF

LOVIN & WITHERS KINGMAN, ARIZONA

We handle everything from a corkscrew to a quartzmill. Send us your order, or come yourself, and you will be forcibly impressed with the great and varied stocks we carry. We can fill orders at all times for Boots, Shoes, Hats, Caps, Gent's Furnishings, every class and description of Canned Goods, Fresh and Dried Fruits, Hams, Bacon, Lard, Flour, Beans, Yeast Powders, Cheeses and Butter, Dainties, Tobacco and Cigars. Miners can be fitted out with every necessity. Hardware and Crockery, both shelf and heavy. You have but to give us your order and we guarantee to fill it in every detail *
